Hi [REDACTED],

The width of the fabric that I am ordering for the kitchen banquet is 118". Do you know what width did Evelyn have in mind when she measured?

I was planning to order 60 yards, to have some extra just in case. Would that be enough?

Thank you,

Karyna

She had a few suggestions about the brand of material to be used for the core and how to construct the higher section on the cabinet side, which Evelyn has taken on.
