 Hello From Rogue Amoeba!

VOLUME 13, ISSUE 1 • FEBRUARY 7, 2015

Hi there, it's Rogue Amoeba CEO/Lackey Paul Kafasis. We've got one of our biggest releases ever to talk about, as well as some major updates to come, so let's get to it!

Really!

AUDIO HIJACK 3 HAS ARRIVED

Late last month we released an [entirely new Audio Hijack](#), and we'd love to show it to you. This is Audio Hijack 3!

 Audio Hijack 3's interface

If you're on this list, you likely know that Audio Hijack is our powerful utility for recording any audio on Mac OS X. You can use it to save audio from individual applications like Safari or Skype, hardware audio devices like microphones or mixers, and even the entire system audio output. If you can hear it on your Mac, Audio Hijack can record it.

For version 3, we thoughtfully examined and considered every aspect of our previous Audio Hijack products. The update incorporates over a decade's worth of experience and feedback to improve the process of recording and enhancing audio.

The most visible change is Audio Hijack's new interface. Its pipeline-style view shows exactly how audio flows and makes Audio Hijack 3 a snap to learn. Different types of Blocks bring in audio from application and hardware sources, adjust it with audio effects, then record it and send it out to speakers. The fully customizable layout means you can configure the exact pipeline you need, to get the audio results you want.

There's so much more to tell, but it won't all fit here. Head over to the [blog post for the release](#) or just [download the free trial](#) and take off from there.

Now, let's see if I can answer some of your most likely questions!

- **I use "Audio Hijack Pro" — what happened to that?**

Audio Hijack 3 is the official successor to all of our previous "Audio Hijack" products, including Audio Hijack Pro. Audio Hijack 3 is the latest version of your software — we've simply dropped the "Pro" suffix.

- **How do I try Audio Hijack 3?**

As always, you can [download a free trial](#) from our site. Note that you can try Audio
