Dear Jeffrey,

I will be sending you pro forma invoice from Von Lux, swiss based company , for boat M46.

We have up to end of this week to pay for the boat. But, I will like to solve it as soon as possible, if it is ok with you.

Today they send me my money back, because I made transfer on Croatian company. Last week they were pushing, and I wanted to show that we are serious.

Never the less, we agreed of two things;

First we will buy boat by paying it this week.

Second, next week we will take it out and prepare it for transport (including work on it, that I have agreed of).

During that time, we can do everything that you want(if you want we can put teak on the floor, things like that).

About benches they asked me- how many people will be usually transferred, how long this trips would be, passengers are coming with luggage or not, boat can go 50 miles-how fast will be driving- depending on this data they will make suggestion . But, during conversation today, it ends up that side benches will be most suitable. And back area for luggage. What do you think?

Boat now have a mean look. All black and grey. Would you like to keep it that way? I think it would be nice. And make all extras of inox. In order to make it look warmer, or more luxury , teak will be best solution. I wouldn't go to far with adding extras, only necessary things (maybe strong spot light for docking during night will be nice) .

Cabin – we agreed (of course if you agree) that aluminum construction will be nice, as the one boat already has, but bigger to protect four passengers. And than - tent over it, black color, that can be kept on all the time, but also removed easily if weather is hot.

I will not go for fix cabin, as the one on the picture, it will destroy look and aerodynamics of the boat.

But than again, except on St. Barth, I have not been in your area, and you are the boss. I will not do anything that you do not approve .

Sorry not to write you before, it was a busy day for me. But i have to tell you , I am enjoying everything about this boat . It is nice break of my everyday business .

Best regards

Zoran Kovac
