SHORT ANSWER

I have all the airports I need for my current job

at this point I think sarah at palm beach is the best bet to buy a few more just in case work gets ahead of IT, at this moment they are not

let me know if I should contact sarah to buy a few more,,,,, thank you JE

long answer:

Jermaine ordered some we bought all they had on this island.

I put an order in as well but my orders will not go thru without confirmations from you to Rich, so until my purchasing probation is lifted I have zero buying power beyond using my own money which I have gladly done in the past but do not currently have the buying power to do so on this island. If you trust me more now I have the verbal power to buy with tekserve at anytime. If you want, but my understanding was my buying power cut off because of the genasucks and crappy printer i bought (WHICH I HAVE RETURNED AND ARE ACCOUNT WAS CREDITED)

I sent the request YESTERDAY to Rich and cced youI did not hear back as I have what I need I moved on.

10am

- post gary meeting
- The theme is fiber, network, communication between departments, Some Bill history
- Restated clearly that TODAY eta is 2:30.... I need fiber on both ends, network patch panel and live connection, at that point I can plugin and test wifi sonos communications with the master network, cisco

switch etc.

-That is far from a complete solution, but its the big step I need to happen. **Phone placement needs your attention in the bathroom to make sure that what they are doing is what you really want there.**

? Has nick been brought back in in anyway to deal with the master,tiki speakers theatre lsj, or is it still only on my plate? Best I can do today is test the sonos amp system which I hope to hear by end of day

-THE GOAL: At the very least I want to see a working wifi connection in the master Bedroom, before that is set up done and tested to up to standards I really can't move forward in the room.

-So Gary should have "Hobbit end done by 12" we then team up at master, while he then repeats the process. So ETA on switch plug-in is 2- 2:30 thats if if everything goes perfect.

- I am going move my gear into the master now and see what issues that alone presents and get back to you.

Whats working now?

-**sonos is playing in office**, (this can be moved to any amp system and reset up in less than an hour from here out)

-**tiki has sonos feed** in place of apple tv *to keep both online would take ... with the current nick end of things --- rca to xlr or a toslink to rca to xlr first makes the most sense)*

-**kitchen system** has worked perfect since you left

-**network password** change which is done

-**Sonos controller programmed and music migrated**

-**New Switches and Airports on order**

so plan now is to work and get as much done by end of day as can be done

(palm beach is the big job for me sun)

thank you

-scott
