Jeffrey,

Bell school is going well, GM fly's this afternoon,.I will take my instrument check ride Thursday and have floats installed on Bell Friday,.

big area of weather around San Juan, terrible weather for next 5 days,.tropical depression possible south of San Juan,.my plan is to fly the Bell 407 to STT on Saturday,.weather permitting,.

I spoke to Jay about his S76 flight June 16th, at this time its 8pm departure from Teterboro to East Hampton,.

Do know when you'll fly Gulfstream again?, **Dave is requesting Vacation for June 17 - 19th**,. I don't want burden you in any way, He should have planned his time off during your absence,. I could use Darren if there is a trip,. Plus I am open minded to using [REDACTED] as co-pilot in a "worse case" scenario if you are Ok with that,.if Darren is busy,. as copilot, her instrument knowledge was impressive,.
your thoughts?

thank you,
Larry
