Hi,

Yesterday and today I've been searching possible universities I could study nursing. There is only three schools in Warsaw which have nursing programs. That's Warsaw University (nursing; public health <http://wnoz.wum.edu.pl/oferta/studia-I-i-II-stopnia> and postgraduate humanitarian action http://www2.wpia.uw.edu.pl/92,Podyplomowe_Studia.html), Curie Skłodowska University (nursing <http://www.uczelniawarszawska.pl/Pielegniarstwo,,623.html> and public health <http://www.uczelniawarszawska.pl/Zdrowie-publiczne,,121.html>) and Medical University of Warsaw. All of those starts in September and take 3 years of BA and after 2 years of MA or 5 years at once. At Medical University they have also postgraduate programs, which are shorter (<http://ckp.wum.edu.pl/node/443>). Nursing is not very popular in Poland anymore, so there is not very much choice. I have found postgraduate public health at Collegium Varsoviense (<http://www.futurus.org/pl/studia/zdrowiepubliczne.html>) and at WP (<http://www.wszechnicapolska.edu.pl/index.php/pl/studia-podyplomowe/zdrowie-publiczne-podyplomowe>). But they don't say anything about recruitment this semester.

I've been searching also related programs which combine health care with what I have achieved at POU.

WSM - health organization management (<http://www.kaweczynska.pl/centrum-ksztalcenia-ustawicznego/oferta-studiow-podyplomowych/wydzial-menedzerski/64-zarzadzanie-organizacjami-ochrony-zdrowia>).

Janski University - management of health condition in older people

(http://www.warszawa.janski.edu.pl/Uczelnia,studia_podyplomowe.html).

WSR postgraduate studies from disabled care (<http://www.wsr.edu.pl/studia-podyplomowe/studia-podyplomowe-kierunki.html>).

There is also very interesting programs at Kozminski, which is one of the best in Poland and high in rankings worldwide. They have health protection management or innovations in health care

(<http://www.kozminski.edu.pl/studiapodyplomowe/#ZarzadzanieOchronieZdrowia/pl/oferta-edukacyjna/studia-podyplomowe/kierunki/prowadzenie-i-monitorowanie-badan-klinicznych/o-studiach/pl/oferta-edukacyjna/studia-podyplomowe/kierunki/prowadzenie-i-monitorowanie-badan-klinicznych/program/>).

There is also a 2 years program of MBA of medical personnel (<http://www.kozminski.edu.pl/pl/oferta-edukacyjna/studia-mba/#MBADlaKadryMedycznej/pl/oferta-edukacyjna/mba/kierunki/kozminski-mba-dla-kadry-medycznej/o-studiach/pl/oferta-edukacyjna/mba/kierunki/kozminski-mba-dla-kadry-medycznej/program/>).

It came to my mind that I could try even wider, which means not only nursing but even sth like humanitarian action or social aid or sth related. What do you think? Thank you for everything :)

Best wishes
