Good night boss

After a few emails with James. I found out that although I was able to run Netflix 4K movie streams through the McIntosh with the existing Apple TV. It still may not be compatible with the new Apple TV 4K. I will send him the receiver spec tomorrow for his review and his recommendations on existing wiring that is currently powering the theater. I will also send him the speaker count and arrangement and projector make and model to ensure compatibility.

Regards
Jruan

do we have internet for the movie room yet, ?
blue ray player, upgrade jermaine, apple 4K. can the receiver handle.
