We have been out from dawn till after dark very day this week finishing the surveys for VIWAPA and the reroute with an ROV, and its not exactly been the best weather. I did not call because you could not hear on the boat and by the time we were packed up it was 9pm every night. I am traveling this morning but if you want I can call late today when I get into Denver, or early next week. I am finishing up the final writing on the EAR know and finalizing it to submit. COE and CZM have asked that we present at the Interagency Meeting on the 21st of June and we will submit that afternoon after the presentation.

If either of you or both of you are interested you can come to the presentation and listen. it will be the only presentation we have to make on this one for CZM since we are able to do cables as a minor. And since this is WAPA, we'll get an expedited Senate Hearing.

COE is happy with what we have submitted so far and there will be no issues since its a WAPA project.
