Vicki is doing the master bathroom countertops. The only other place I thought we could maybe use left over kitchen granite for the top of the outdoor bar. That would be Jennifer's guy

I will get all vanities in place. I think you need to template the bathroom also. Is it the same people? Is there any other place that needs to be template? Tile guy has one more day. He just needs the final tile and we can call the glass guy.

Hi Jennifer...

Does your template guy need the cook top to template the granite?
What all do we need to make sure is done
before we have him come out?
