they should...why don't you run that by Mike though...**Loure®**

Combining a sleek profile with enhanced utility, Loure introduces a classically modern look to your bath decor. This strikingly contemporary sink faucet offers a stately design with clean, smooth lines. The tall height works well with vessel-style sinks, providing a waterfall-inspired flow easily controlled by a single lever.

This is the master bath sink template. Its says spouts need to be 8 inches tall to make it into sink. Will your faucets fit this?
