Subject: More on Viscount White Granite

...if we buy another slab of the Viscount White Granite, there may be enough to do the top of the outdoor bar (the bar height side...not the cooking side...) Or is it better to do the bar out of the same granite we are putting on the patio?

How long do you think the outdoor bar will be? Maybe like 10feet? Do you see the bar height side being 12" to eat and drink on?
