Yes, apologies for the confusion. I remembered after sending you the Eclipse quote that we had discussed the Cirrus option earlier. Busy afternoon!

Let me know if I can answer any other questions about it. We'd love to help with this trip.

Best,  
Melissa

Hi [REDACTED]

We do also have a Cirrus aircraft that would be good for the one way trip from New York to Boston on September 4th should it be of interest. The Cirrus SR-22 is a state of the art, piston-single aircraft that can accommodate up to three passengers. For such a short trip, it would just be a slightly longer trip than the Eclipse jet. However the cost is significantly less.

The cost of the one way trip from LaGuardia to Boston would be \$2,443. The cost from LaGuardia to Bedford would be \$2,089.

This includes all fees and taxes. Availability is confirmed at the time of booking.

Details about the two different types of planes can be found here:
