Need to get a meeting with you and the electrician and Ike on Friday. We are putting all the vents in now. There are a lot of constraints where we can put them because of framing. I assume your bed will be on the far wall coming into the bedroom. I don't think there are any there. They are marked on the floor and the ceiling. We are doing that now.

Bob I want to make sure I get to go around with HVAC guy and point out where I do not want a vent or vise versa. Like I know I do not want a vent over my side of the bed. Can we do Friday?
