Alternative Aviation Fuels and Their Impact Upon Your Flying

By Jeremy Cox
JetBrokers, Inc.

The single biggest operational expense to you when you fly is the cost of the Jet Fuel that is fed through your engine. Even though the modern gas turbine 'jet' engine is significantly different than what was first designed and conceived by its inventors, this type of engine does require a considerable amount of fuel to enable it to achieve the necessary power levels to attain, and sustain flight within the stratosphere...
